

HASTELLOY

Characteristics.

- Steel alloys are based highly resistant to corrosion and oxidation nickel.
- Are super alloys or high performance alloys.
- Ease of welding and fabrication.
- Can be used in chemical processing, aerospace, industrial gas turbines, marine industry, areas of energy, health and environment, oil and gas, pharmaceutical and flue gas desulfurization, etc.
- Excellent resistance to stress corrosion cracking.
- Good resistance to acids such as sulfuric, nitric, hydrochloric, hydrofluoric and chromic.

Shape or Presentation

- Plate
- Tube
- Tubing
- Pipe Fittings
- Welding material
