

MONEL

Characteristics.

- Nickel based alloy.
- High resistance to atmospheric corrosion, salt water, acid and alkaline solutions, etc.
- It is malleable.
- Stronger than steel.
- Alloys are generally used in the marine industry, in the chemical industry or in the oil industry.
- Other uses of this type of alloys: valves, shafts, fittings, pumps, heat exchangers, tools for oil wells, screws, etc.

Shape or Presentation

- Bar
- Plate
- Print
- Tube
- Tubing
- Connections
- Wire
- Rollers
