

TITANIUM 11

Characteristics.

- Like Grade 1, except for the palladium addition in a small quantity to improve resistance to corrosion.
- This resistance to corrosion is useful to protect cracking erosion and to reduce the acid in chloride environments.
- Optimal ductility.
- Resistant to impact and excellent weldability.
- This alloy can be used in the same applications as Grade 1.

Shape or Presentation

- Diverse

Industries in which it's used

- Chemical Industry
- Marine Industry
